

# Hatikvah International Academy Charter School Pandemic Crisis Plan

March, 2020

## Background

### From the NJ Department of Health Memo - March 2, 2020

Many childcare centers, school administrators, teachers and parents within New Jersey are concerned about how the current outbreak of the 2019 Novel Coronavirus (COVID-19) will impact their communities and wish to take appropriate steps to mitigate any risks. The word "novel" means new. The Centers for Disease Control and Prevention (CDC) is working hard to learn as much as possible about this new virus so that they can better understand how it spreads and its associated illness. The New Jersey Department of Health is also working hard by developing guidance and education materials should this new virus impact our residents.

Though the CDC considers COVID-19 to be a serious public health concern based on current information, the immediate health risk to the general U.S. public is considered low at this time. The CDC and the World Health Organization are closely monitoring the national and global situation and providing ongoing guidance. At this time, the CDC recommends avoiding nonessential travel to China, Iran, Italy and South Korea. There are additional countries with travel alerts. Updated travel information specific to COVID-19 can be found at <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>.

#### **What is the difference between seasonal and novel coronavirus?**

Coronaviruses are a family of viruses and there are different types of coronavirus within that family, much like there are different types of influenza viruses. Coronaviruses in general are not new and are a frequent cause of respiratory illnesses such as the common cold. Coronaviruses tend to circulate in the fall and winter months, similar to influenza. Most people get infected with these viruses at some point in their lives. The type of coronavirus that has recently emerged in Wuhan, China **is a new type** of coronavirus and is infecting people for the first time (which means that people do not have any immunity to it). This newly discovered virus is called SARS-CoV-2 and is causing a disease named COVID-19.

**What are common symptoms of COVID-19?** Information to date suggests this virus is causing symptoms consistent with a respiratory illness such as cough, fever, and shortness of breath.

**How is COVID-19 spread?** At this time, it's unclear how easily or sustainably this virus is spreading between people. Typically, with most respiratory viruses, people are thought to be most contagious when they are most symptomatic (the sickest). Chinese officials report that sustained person-to-person spread in the community is occurring in China. Similar spread has been reported in other countries. Person-to-person spread in the United States has been detected but the risk to the general public remains low. Cases in healthcare settings, like hospitals, may also occur.

**What measures can be taken to prevent COVID-19?** There is currently no vaccine to prevent COVID-19 infection. The best way to prevent infection is to avoid being exposed to this virus. However, as a reminder, CDC always recommends everyday preventive actions to help prevent the spread of respiratory viruses.

**How is COVID-19 treated?** Currently, there is no specific antiviral treatment recommended for the coronavirus. There is no vaccine to prevent this virus, and the CDC advises that the best way to prevent infection is to avoid being exposed to this virus.

**How should schools prepare for the potential of a coronavirus outbreak in their community?**

To prepare for possible community transmission of COVID-19, the most important thing for schools to do now is **plan** and **prepare**. Interim Guidance for Administrators of US Childcare Programs and K-12 Schools to Plan, Prepare, and Respond to Coronavirus Disease 2019 (COVID-19) can be found at <https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/guidance-for-schools.html>.

- Review and update or develop your outbreak response/pandemic plan and share with stakeholders before an outbreak occurs.
- Establish procedures to ensure students and staff who become sick at school or arrive at school sick are sent home as soon as possible.
- Prepare for the potential of school closures or dismissals or cancellation of school events.
- Prepare to offer home instruction to students.
- Implement flexible attendance and sick leave policies. Students or their parents check-in once daily on Google classroom. Teachers who do not see this check-in done look for student work that is submitted, student activity online and check with each other for any contact before a student is marked absent.
- Establish relationships with local public health officials and identify points of contact.
- Create emergency communication plan and maintain up to date contact information for everyone in your communication chain.

- Establish leadership team, identify essential staff functions, assign tasks and responsibilities.
- Plan workshops and training to educate staff on prevention measures.
  - Continue to monitor current information from health officials.

**What should a school do when a student or staff presents with symptoms of COVID-19?**

- COVID-19 presents with signs and symptoms that may be indistinguishable from much more common respiratory viruses. At this time, respiratory illnesses are much more likely to be due to common viruses (e.g., influenza, common cold) than COVID-19. If a community (or more specifically, a school) has cases of COVID-19, local health officials will help identify those individuals and will follow up on next steps. Schools are not expected to screen students or staff to identify cases of COVID-19.
- Students with fever, cough, or difficulty breathing should be placed away from others and asked to wear a face mask until they can be sent home.
- Staff members should be sent home and advised to seek medical advice.
- Notify your local health department with any questions or concern about an ill student [www.localhealth.nj.gov](http://www.localhealth.nj.gov).

# THE FOUR STAGES OF THE CRISIS PLAN

According to the World Health Organization (WHO), the medical arm  
of the United Nations:

Prevention – Mitigation

Preparedness

Response

Recovery

## Prevention-Mitigation

A. Review/Enhancement of Policies and Procedures

B. Training

C. Communications System

D. Prevention

A. Review and Enhancement of Policies and Procedures
--

1. Members of the PPC are listed below and may be asked to meet as needed.
2. This plan may be modified based on new information and updates from the CDC, The NJ Health Department, and the NJDOE. Meetings may be held to review, update, and approve the Pandemic Crisis Plan for the upcoming school year and conduct tabletop emergency exercises. PPC committee members will review and understand their roles and responsibilities during a pandemic crisis.
3. Staff email distributed to all families via email.

Contact	Title	Contact Information	Alternate Contact	Title	Contact Information
Marcia Grayson	Chief School Administrator; Director	mgrayson@hiacs.org	Amanda Rosenberg	Supervisor (Principal)	<a href="mailto:arosenberg@hiacs.org">arosenberg@hiacs.org</a>
Sara Schwartz	Head of Risk Management Committee	sschwartz@hiacs.org	Marcia Grayson	Vice Chair	
Chevy Speiser	Child Study Team Case Manager	cspeiser@hiacs.org	Marcia Grayson	Director	
Kathy Mone	School Business Administrator	kathymone@gmail.com	Marcia Grayson	Director	
Stacy Weissman	School Nurse	sweissman@hiacs.org			
Mr. Edwin Gano	Local Health Dept.	(732) 745-3100			
Heather Gibson	School Counselor	<a href="mailto:hgibson@hiacs.org">hgibson@hiacs.org</a>			

## B. Training

1. Annual training for staff members may be conducted as needed each year. The following topics may be discussed (Appendices A and A1)
  - i. Prevention
  - ii. Preparation
  - iii. Symptom Recognition and Action
  - iv. Communication
  - v. Communication for Staff
  - vi. Plan Distribution
  - vii. Continuation of Instruction Development
  - viii. Grading Expectations
  - ix. Work Related Responsibilities During School Closure
  - x. Student Expectation Communication/Rubrics

## C. Communications System

1. Employee handbooks outline the specific calling out procedures to identify pandemic related symptoms in staff and students.
2. The Director will serve as the contact person for addressing questions and concerns related to the topic of pandemic planning; the primary contact will be [mgrayson@hiacs.org](mailto:mgrayson@hiacs.org).
3. Staff and student contact details will be annually updated into the OnCourse student data management system for the purpose of accurate communication.
4. An electronic system will be used to communicate updates and information to all stakeholders in various formats (text, email, call, etc.).

## D. Prevention

1. The school nurse and Director will disseminate messages about preventive hygiene and conduct respiratory etiquette programs (e.g. cough in your sleeve). Dissemination techniques will include, but not be limited to, classroom presentations, school-wide posters, videos and training to staff via in-services or faculty meetings, hand washing signs in all bathrooms. Teachers will be trained in symptom identification via the annual mandatory universal precautions training in August.
2. The Maintenance person will ensure that all building bathrooms are continually stocked with soap and paper towels.
3. The Maintenance person will ensure that all student contact spaces are sanitized on a frequent and regular basis; hand washing signs will be posted.

4. Teachers, building staff, and administrators will remind students to cover their coughs and sneezes.
5. School nurses will encourage staff and students to obtain (on their own) flu shot vaccinations.
6. School health professionals are encouraged to obtain flu shot vaccinations annually.

## Preparedness

A. The Surveillance System

B. Updates, Research, and Precautions

C. Continuity of Student Learning Preparation

D. Stock

E. Counseling Support

## A. The Surveillance System

The following processes and procedures are to be practiced to continually report the absentee rates for staff and students in collaboration with local health departments once a pandemic has been confirmed as present in New Jersey or once such information has been requested by the Health Department and/or County Superintendent's Office:

- The school nurse will authorize individual student and staff dismissal due to identified and pandemic related symptoms; any students and/or staff members with these symptoms will be sent home immediately and required to remain at home for the infectious period or clearance from a physician. Students awaiting parents/guardians due to illness will be held in a separate area in the Nurse's Office or another designated location until pick up.
  
- The building secretary responsible for attendance reporting will forward, on a daily basis, the names of **students** who are absent due to pandemic related symptoms to the school nurse (Appendix B); the school nurse will document and monitor medically based absentee rates internally looking for increased reports of absence due to pandemic related illness (Appendix D). Absentee rates will not be reported to the Health Department unless greater than 15% of the population or unless requested by the Health Department and/or County Superintendent's Office.
  
- Operations Coordinator will forward the names of faculty and staff who are absent due to pandemic related illness to the school nurse (Appendix B) on a daily basis; the school nurse will document and track medically based absentee rates internally looking for increased reports of absence due to pandemic related illness (Appendix D). Absentee rates will not be reported to the Health Department unless greater than 15% of the population or unless requested by the Health Department and/or County Superintendent's Office.
  
- Staff will be reminded to send sick students to the Nurse's Office.

## B. Updates, Research, and Precautions

1. The CSA will provide updates and the latest research information to staff, students, and parents via email communication.
2. The Director will cancel and announce cancellation of all large group activities if directed to do so by the NJ Health Department and/or County Superintendent's office.
3. The school nurse will disseminate messages about preventive hygiene and conduct respiratory etiquette programs (cough in your sleeve). Dissemination techniques will include, but not be limited to, classroom presentations, school-wide posters, videos and training to staff via in-services or faculty meetings, hand washing signs in all bathrooms. Teachers will be trained in pandemic related symptom identification.
4. The Maintenance person will ensure that all building bathrooms are continually stocked with soap and paper towels.
5. The Maintenance person will ensure that all student contact spaces are sanitized on a daily basis; hand washing signs will be posted.
6. Teachers, building staff, and administrators will remind students to cover their coughs and sneezes.
7. Informational literature will be sent home identifying the protocols parents should use to keep kids home (Appendix A).
8. Building administration will arrange for a standard informational mailing to go out to parents and guardians on the following topics (Appendix A).
  - i. Prevention
  - ii. Preparation
  - iii. Pandemic Symptom Recognition and Action
  - iv. Communication
11. Building administration will remind staff to review this plan.

<b>K-8 instruction</b>	All teachers in the school have set-up Google Classrooms and will instruct remotely during regular school hours. Teachers continue to run guided reading groups and students receive extra help in homework help rooms as well as in Title I homework assistance rooms. Students with new learning issues surfacing during the closure receive up to daily attention by teacher or administrators. Grades are being closely monitored as are student work samples.	Students who do not have access to laptops will be given laptops to borrow. If the school closes before laptops are distributed, paper copies of work will be sent via email.
<b>K-8 Special Needs</b>	All students are assigned to ICR so accommodations and modifications will be made via Google Classroom. Teachers will be available during school hours. A number of students are being called, texted, and personally met on Google Meets to provide a full continuation of daily services. Progress monitoring continues as per the IEP and overseen by the CST Case Manager.	
<b>K-8 Special Services</b>	Services for I.E.P.s, 504s, and English language learners will be offered through Google Classroom and Zoom during regular school hours. Parents receive any hard copies needed to print or sent to the home if the family is unable to print. Progress monitoring continues as per the IEP and overseen by the CST Case Manager.	Parents of students with IEPs and 504s will be asked to sign a potential confidentiality waiver for group services offered while students are at home.

C. Continuity of Student Learning Preparation (Policy #6173) Home Instruction

Related Services and students receiving Eligible for Speech and Language Services: Google classroom lessons assigned by related services staff to target IEP goals and objectives; paper-based assignments for students without device and/or wifi. Compensatory services provided as needed upon return to school.

Counseling: Support will be provided via phone conference if warranted to address relevant concerns. Otherwise, groups will be run via Zoom.

Section 504: School Counselor and Case Manager to monitor and provide additional support per individual plans.

ADA Compliance: Assignments posted on the ADA compliant District Website.

D. Stock

- The Maintenance person will ensure ample storage of appropriate and adequate sanitation supplies such as soap, alcohol gel, and tissues in all bathrooms.
- All classrooms will receive hand sanitizing gel for regular use.

## Response

A. Protocol - Schools Open

B. Protocol - Schools Closed

C. Other Core Operations

A. Protocol - Schools Open
----------------------------

When necessary, the Chief School Administrator will initiate the response process:

Main Administrative Office

- The CSA will send out message via OneCall Now, email and post on the school's website informing parents that schools remain open, encouraging the school community to refer to handbooks, the school calendar, and school website and the CDC website for additional information.
- The CSA will provide updates and the latest research information to staff, students, and parents via email.

School Nurse

- The school nurse will continue with surveillance reporting procedures, conduct student as well as staff assessments and provide updates to administration.
- The school nurse will serve as the primary authority for sending home sick staff and students. Students and staff deemed ill and having pandemic related symptoms will not remain at school and should return only after their symptoms resolve and they are physically ready to return to school; they will be required to remain at home for the infectious period.
- Student absences will be counted as excused and staff absences will be counted as sick days.
- Students and staff not reporting to school due to pandemic related symptoms and illness are only required to call once during the illness period to report absences.

Teachers

- Reinforce student infection control procedures.
- Send students to the school nurse who appear ill.

Building Administration

- Support and endorse nursing decisions.
- Monitor and report absences to central office.
-

### Custodial Staff

- Ensure ample supply of sanitizing supplies and daily sanitizations.
- Take appropriate actions to minimize the risk of viral transmission in school facilities to the greatest extent possible.
- Prepare all facilities for reliable functioning as part of community response efforts (e.g., a building used as an isolation facility).
- Prepare to restore facilities to their normal use.
- Assure the provision of power, heat and ventilation, water, sewer, janitorial services, etc. appropriate to facilities.

### Secretarial Staff

- Reinforce student infection control procedures.
- Send students who appear ill to the school nurse.

### School Counselor/ Child Study Team Case Manager

- Promote students, faculty, and staff mental wellbeing during the event via email and telephone or online in Google Classroom or Zoom when appropriate.

### **Addressing Stigma**

Stigma can affect people, places, or things. It occurs when people associate a risk with something specific—like a minority population group—and there is no evidence that the risk is greater in that group than in the general population. Stigmatization is especially common in disease outbreaks.

Example: A 2002 outbreak of severe acute respiratory syndrome (SARS) in China caused global concern. Unfortunately, fear also led to a great deal of stigma. Although there were no associated cases of SARS in America, many citizens began to avoid Chinatowns and other Asian-American communities—including Japanese, Korean, and Vietnamese peoples—throughout the United States because they believed those groups were at greater risk for spreading SARS.

Stigmatized groups may suffer psychologically and economically. They may be subjected to:

- Social avoidance or rejection
- Denial of healthcare, education, housing, or employment
- Physical violence

Stigmatizing minority groups may also distract people from focusing on the real risks in a crisis situation. When only part of a population is perceived as being

affected, others may incorrectly believe they are not at risk. By assuming they are safe, majority population groups may not take important public health precautions, unintentionally compromising their own health and well-being.

Crisis communicators must work to counter stigmatization during a disaster. Messages should reinforce real risks through accurate information and awareness. Images should reflect all people who are susceptible to getting sick. Ideally, public health messages will proactively address possible stigma before it begins. However, prepared communicators should be ready to challenge any negative stigmatizing behaviors that do emerge.

## B. Protocol (Schools Closed)

When necessary, the CSA will activate the response plan.

### Main Office

- CSA informs school community that the school has been directed to close some or all schools identified by the state; any non-academic events will be cancelled as well.
- Send OneCall Now, email, post on the school's website, inform parents that schools are closed; encourage school community to refer to handbooks, the school calendar, and school website for additional information.
- The CSA will provide updates and the latest research information to staff, students, and parents via OneCall Now, email, post on the school's website.

### School Nurse

- Check, monitor, and respond to email messages on a daily basis.
- Provide health updates to Director for posting via email.

### Teachers

- Check, monitor, and respond to Google Classroom and email messages on a daily basis during regular school hours.
- Grade work submitted through continuation of learning process.
- Log pupil, parent, staff contacts.
- Prepare lesson plans for the recovery phase.
- Complete reports as necessary.

#### Administration/Supervisors

- Implement their continuity of education services plan.
- Check, monitor, and respond to email messages on a daily basis.
- Monitor staff health and work performance.
- Complete reports as necessary.

#### Custodial Staff

- Restock ample supply of sanitizing supplies.
- Take appropriate actions to minimize the risk of viral transmission in school facilities to the greatest extent possible.
- Prepare school for reliable functioning as part of community response efforts.
- Prepare to restore facilities to their normal use.
- Assure the provision of power, heat and ventilation, water, sewer, janitorial services, etc. appropriate to facilities based on their classification during an event.

#### School Counselor/ Child Study Team Case Manager

- Counselor and child study team members will check, monitor, and respond to email messages on a daily basis during contracted school days.
- Psychological first aid services will be recommended as needed.

C. Other Core Operations
--------------------------

#### Payroll

- The Business Office will continue regular functioning from a remote location.

# Recovery

When necessary, the Chief School Administrator will initiate the recovery process. School closure days as a result of this pandemic will not result in an extended school year if permissible per NJDOE; ten-month staff will remain through June 30<sup>th</sup> to complete any unfinished work if necessary, but the administrative staff will attempt to avoid this outcome.

Those students who can document illness to self or a member of the immediate family will have one additional month to make up missed work; extenuating circumstances will also be taken into consideration.

## Central Office

- Identify healthy staff to determine the feasibility of reopening schools.
- The CSA will provide updates and the latest research information to staff, students, and parents via email.
- If appropriate, CSA will announce that Hatikvah International Academy Charter School is to reopen.

## School Nurse

- The school nurse will continue with surveillance reporting procedures, conduct student as well as staff assessments, communicate with parents/guardians as well as provide updates to administration.
- The school nurse will serve as the primary authority for sending home sick staff and students. Students and staff deemed ill and having pandemic related symptoms will not remain at school and should return only after their symptoms resolve and they are physically ready to return to school; they will be required to remain at home for the infectious period.
- Student absences will be counted as excused and staff absences will be counted as sick days.
- Students and staff not reporting to school due to pandemic related symptoms and illness are only required to call once during the virus period to report absences.
- Follow up with students who are deemed at high risk for pandemic related complications.

- Physical assessment and needs of students who contacted school nurse during the response phase.

#### Teachers

- Reinforce student infection control procedures.
- Send students to the school nurse who appear ill.
- Each classroom room teacher must maintain the structure of the class but have the class engage in a creative processing activity such as journal writing, discussion related to the event, tie in of content matter to event; this must happen for a minimum of one day.
- Each classroom teacher should acknowledge the loss and/or event.

#### Administration/Supervisors

- Support and endorse nursing decisions.
- Monitor and report absences to Director.
- Serve as the primary contact person and authorizing body for all activities.
- Maintain contact with parents/guardians as well as school community keeping them abreast of what the building is doing for the reestablishment of a positive school climate.
- Monitor grading and assist in the reestablishment of a positive school climate.

#### Custodial Staff

- Ensure ample supply of sanitizing supplies and daily sanitizations.
- Ensure appropriate actions are taken to minimize the risk of viral transmission in school facilities to the greatest extent possible.
- Prepare all facilities for reliable functioning as part of community response efforts.
- Prepare to restore facilities to their normal use.
- Assure the provision of power, heat and ventilation, water, sewer, janitorial services, etc. appropriate to facilities based on their classification during an event.

#### Secretarial Staff

- Report absentee to building nurse immediately (Appendix B).
- Reinforce student infection control procedures.
- Send students to the school nurse who appear ill.

### School Counselor/ Child Study Team (Appendix F)

- Promote students, faculty, and staff mental wellbeing during the event via email and group counseling sessions.
- Assessment of functioning and needs of students via referral system.
- Follow up with referrals.
- Follow up with students who called in/made contact during response.
- Stabilization groups will be conducted for students who cannot cope in the classroom setting.
- Coping groups will be conducted for the purpose of preventing post-traumatic stress.
- Conduct seminars for parents related to support, information, and referral services.

### **Reactions to Stress**

#### **Managing Fears and Anxiety around Coronavirus**

As information about Coronavirus unfolds, there can be a wide range of thoughts, feelings and reactions. Below is some helpful information.

**Common Reactions:** Please recognize that there can be a wide range of reactions and that over the next few days or weeks you may experience periods of:

- Difficulty concentrating and sleeping
- Anger
- Hyper-vigilance to your health and body
- Anxiety, worry, panic
- Feeling helplessness
- Social withdrawal

#### **Ways to Manage Fears & Anxieties:**

- Get the facts. Stay informed. For further information, see the dedicated CDC website. <https://www.cdc.gov/coronavirus/2019-ncov/summary.html>
- Keep things in perspective. Limit worry and agitation by lessening the time you spend watching or listening to upsetting media coverage. Although you'll want to keep informed — especially if you have loved ones in affected countries — remember to take a break from watching the news and focus on the things that are positive in your life and things you have control over.

- Be mindful of your assumptions about others. Someone who has a cough or a fever does not necessarily have coronavirus. Self-awareness is important in not stigmatizing others in our community.
- Stay healthy. Adopting healthy hygienic habits such as washing your hands with soap and water or an alcohol-based hand sanitizer, frequently, and certainly after sneezing or before/after touching your face or a sick person. Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing. Avoid touching your eyes, nose and mouth. Avoid contact with others who are sick and stay home while sick.
- Keep connected. Maintaining social networks can help maintain a sense of normalcy and provide valuable outlets for sharing feelings and relieving stress.
- Seek additional help. Individuals who feel an overwhelming worry or anxiety can seek additional professional mental health support. You may call your school counselor (who will be available as usual when school is open and via phone and email if school is closed).

#### Buildings and Grounds

- The school will be sanitized under the direction of the Maintenance person.

## **Appendix A**

What is Pandemic? A “pandemic” is a disease that spreads all over the world and affects a large number of people. If you are caring for a loved one during a pandemic, it’s important to take steps to protect yourself and others. Always follow the most current advice of the U.S. Department of Health and Human Services and your local Health Department.

### **Prevention:**

These healthy habits will help keep you and others from getting and passing on the virus:

- Clean your hands often with soap and water or alcohol-based hand sanitizer.
- Cover your mouth and nose with a tissue when you cough or sneeze and clean your hands afterward. Put used tissues in a wastebasket.
- Cough or sneeze into your upper sleeve if you don’t have a tissue.
- Keep your hands away from your eyes, nose and mouth to prevent germs from entering your body. Also, a person with signs of the virus should stay home from work, school and errands and avoid contact with others.
- OBTAIN A FLU SHOT.

### **To limit the spread of germs and prevent infection:**

- Teach your children to wash hands frequently with soap and water and model the correct behavior.
- Teach your children to cover coughs and sneezes with tissues and be sure to model that behavior.
- Teach your children to stay away from others as much as possible if they are sick.
- Stay home from work and school if sick.

Caregivers should always wash their hands before providing care. Afterward, wash again and apply alcohol-based hand sanitizer as well. Follow these steps for proper hand hygiene:

- Wet hands with warm, running water and apply liquid soap.
- Rub hands vigorously for 20 seconds, covering all surfaces and fingers.
- Scrub nails by rubbing them against the palms of your hands.
- Rinse your hands with water.

- Dry your hands thoroughly with a paper towel and use it to turn off the faucet. A shared towel will spread germs.

**Preparation:**

You can prepare for a pandemic now. You should know both the magnitude of what can happen during a pandemic outbreak and what actions you can take to help lessen the impact of an influenza pandemic on you and your family. This checklist will help you gather the information and resources you may need in case of a flu pandemic.

**Plan for an extended stay at home during a flu pandemic.**

- Ask your employer about how business will continue during a pandemic.
- Ask your employer if you can work from home during a virus/flu pandemic.
- Plan for a possible reduction or loss of income, if you are unable to work or your place of employment is closed.
- Check with your employer or union about leave policies.
- Plan home learning activities and exercises. Have materials, such as books, on hand.
- Plan recreational activities that your children can do at home.

**Items to have on hand for an extended stay at home:** During a pandemic, if you cannot get to a store, or if stores are out of supplies, it will be important for you to have extra supplies on hand. This can be useful in other types of emergencies, such as power outages and disasters.

**Non-perishable foods supplies**

- ~Ready to eat canned meats, fruits, vegetables, soups
- pressure monitoring
- ~Protein or fruit bars
- hand wash
- ~Dry cereal or granola
- acetaminophen
- ~ Peanut butter and jelly
- ibuprofen (Motrin)
- ~Dried fruit, nuts, trail mix
- ~Baby formula

**Health and emergency**

- ~Prescribed medical supplies such as glucose and blood
- ~Soap and water or alcohol-based
- ~Medicines for fever, such as (aspirin) or
- ~Thermometer
- ~Antidiarrheal medications

- ~Crackers
  - ~Canned juices  
Pedialyte®
  - ~Bottled water
  - ~Canned or jarred baby food
  - ~Baby formula
  - ~Pet food
- diapers

- ~Vitamins
- ~Fluids with electrolytes, such as
- ~Flashlight with extra batteries
- ~Portable radio with extra batteries
- ~Manual can opener
- ~Garbage bags
- ~Tissues, toilet paper, disposable

**To plan for a pandemic:**

- Ask your doctor and insurance company if you can get an extra supply of your regular prescription drugs.
- Talk with family members and loved ones about how they would be cared for if they got sick, or what will be needed to care for them in your home.
- Volunteer with local groups to prepare and assist with emergency response.
- Get involved in your community as it works to prepare for a pandemic.

<b>Cold Symptoms</b>	<b>Flu Symptoms</b>	<b>COVID-19 Symptoms</b>
Stuffy nose	Fever	Fever
Sneezing	Headache	Cough
Sore throat	Often and severe aches	Shortness of breath
Mild to moderate chest discomfort/cough	Extreme exhaustion	*Be mindful of recent travel or contact with people who recently traveled.
	Stuffy nose	
	Sneezing	
	Sore throat	

**Communication:**

The CSA will provide updates and the latest research information to staff, students, and parents via email.

For more information, call your healthcare provider or visit the CDCs 2019 Novel Coronavirus Situation Summary at:

<https://www.cdc.gov/coronavirus/2019-ncov/summary.html>

## Reactions to Stress:

### Managing Fears and Anxiety around Coronavirus

As information about Coronavirus unfolds, there can be a wide range of thoughts, feelings and reactions. Below is some helpful information.

**Common Reactions:** Please recognize that there can be a wide range of reactions and that over the next few days or weeks you may experience periods of:

- Difficulty concentrating and sleeping
- Anger
- Hyper-vigilance to your health and body
- Anxiety, worry, panic
- Feeling helplessness
- Social withdrawal

### Ways to Manage Fears & Anxieties:

- Get the facts. Stay informed. For further information, see the dedicated CDC website. <https://www.cdc.gov/coronavirus/2019-ncov/summary.html>
- Keep things in perspective. Limit worry and agitation by lessening the time you spend watching or listening to upsetting media coverage. Although you'll want to keep informed — especially if you have loved ones in affected countries — remember to take a break from watching the news and focus on the things that are positive in your life and things you have control over.
- Be mindful of your assumptions about others. Someone who has a cough or a fever does not necessarily have coronavirus. Self-awareness is important in not stigmatizing others in our community.
- Stay healthy. Adopting healthy hygienic habits such as washing your hands with soap and water or an alcohol-based hand sanitizer, frequently, and certainly after sneezing or before/after touching your face or a sick person. Cover your mouth and nose with a tissue or your sleeve (not your hands) when coughing or sneezing. Avoid touching your eyes, nose and mouth. Avoid contact with others who are sick and stay home while sick.
- Keep connected. Maintaining social networks can help maintain a sense of normalcy, and provide valuable outlets for sharing feelings and relieving stress.
- Seek additional help. Individuals who feel an overwhelming worry or anxiety can seek additional professional mental health support. You

may call your school counselor (who will be available as usual when school is open and via phone and email if school is closed).

## Appendix A1

Communication for  
Staff Members:

Staff members are not to communicate with the media; the following statement should be utilized when questions and/or concerns from the media and/or the public arise:

“The District is taking all necessary measures to protect students, staff, and provide a continuity of operations as required. Added information will be provided from Director’s office when it becomes available. “

Plan Distribution: Please store and keep this plan in a safe place where you can access it if and when necessary.

Grading

Expectations: Teachers are asked to grade assignments as they come in via email and Google Classroom while schools are closed.

Work Related Teachers are asked to maintain contact with students via email and/or Google Classroom or phone.

Responsibilities: Communication logs and work logs are to be maintained while schools are closed.

During Extended School Closures:

Student Expectation is to continue completing assignments as usual via Google Classroom.

Teachers are required to communicate grading expectations for the time spent outside of school as though students were in the live face to face classroom.

Communication/assignments in the case of an extended school closure.

Rubrics and assignment expectations need to be clearly communicated.

## Appendix B

### Absentee Questionnaire for COVID-19

This form is to be completed by office staff if/when he./she receives a phone call for illness related reasons. This information is to be forwarded to the school nurse for informational purposes only.

Student Name: \_\_\_\_\_  
Grade: \_\_\_\_\_ Date: \_\_\_\_\_

Does your child: Yes  
No

1. have a fever \_\_\_\_\_( Temperature:\_\_\_\_\_)  
\_\_\_\_\_
2. have a cough \_\_\_\_\_  
\_\_\_\_\_

**Fax this form each Friday during the period of Heightened Surveillance  
to NJ LINCS Agency**

## **Appendix E**

### **SAMPLE KEY MESSAGES FOR SCHOOL OFFICIALS - OUTBREAK**

- We know this is an anxious time for our community and our hearts go out to those who are ill. We are working closely with local health officials to deal with the situation and will keep parents updated with any important information.
  
- At this time, under the guidance of the county Health Department, we believe students can safely attend classes and schools will remain open. Our thoughts are with all of our families and children who are affected.
  
- If the pandemic continues to spread and more students become ill, health officials may need to close schools for an extended period of time (for example, up to 6 weeks).
  
- The purpose of closing schools will be to decrease contact among children in order to decrease their risk of getting sick and to limit the spread of infection. If schools are closed, children should stay at home.
  
- We urge parents to plan now for the possibility of schools closing. Arrange day care, and homeschooling.
  
- Parents can help protect their children and prevent the spread of a pandemic as they would colds and other flu by taking the following precautions:
  - Teach your children to wash hands frequently with soap and water for 20 seconds. Be sure to set a good example by doing this yourself.
  - Teach your children to cover coughs and sneezes with tissues or by coughing into the inside of the elbow.

➤ Teach your children to stay away from people who are sick and stay home from work or school if you are sick.

## **SCHOOL CLOSURE**

### Sample Press Releases

- Middlesex County health officials have ordered the closure of schools as a result of a pandemic outbreak in our county.
- Schools may be closed for an extended period of time (for example, up to 6 weeks).
- We know this is a difficult time for our community and our hearts go out to those who are ill. We are working closely with health officials to deal with the situation and will keep parents updated with any important information.
- Because a pandemic is easily spread from person-to-person, it is unsafe for large groups of people to gather and children should stay home. The purpose of closing schools is to decrease contact among children in order to decrease their risk of getting sick and to limit the spread of infection.
- During this time, children and adults should stay away from other people and groups, as much as possible. Health officials also advise people should not gather in other locations such as homes, shopping malls, movie theaters or community centers.
- Parents can help protect their children and prevent the spread of a pandemic as they would colds and other flu by taking the following precautions:
  - Teach your children to wash hands frequently with soap and water for 20 seconds. Be sure to set a good example by doing this yourself.
  - Teach your children to cover coughs and sneezes with tissues or by coughing into the inside of the elbow.
  - Teach your children to stay at least three feet from people who are sick and stay home from work or school if you are sick.
